Investment Risk Disclosure

There are risks associated with investing in securities which may not be suitable for everyone. Investing in stocks, bonds, exchange traded funds, mutual funds, futures, options, currency markets and money market funds involve large potential for reward, but also a risk of loss of part or all of your principal. If you are trading futures, there is a chance that your account can go negative, and that you will end up owing money to your broker. Past investment performance is not a guarantee or predictor of future investment performance. The Vendor does not make any guarantee or other promise as to any results that may be obtained from using our products. No one should make any investment decision without first consulting his or her own financial advisor and conducting his or her own research and due diligence. Options involve risk and are not suitable for all investors. Prior to buying or selling an option, you must consult your own financial advisor. By viewing, accessing, using, or adding The Vendor's products, in any way, you acknowledge the risks involved in trading stocks, bonds, exchange traded funds, mutual funds, futures, options, currency markets, and money market funds and that you, not The Vendor, are solely responsible for any losses, financial or otherwise, as a result of using their products to the maximum extent permitted by law, The Vendor disclaims any and all liability in the event any information, commentary, analysis, opinions, advice and/or recommendations prove to be inaccurate, incomplete or unreliable, or result in any investment or other losses.

No Representation

No representation is being made that the use of this strategy or any system or trading methodology will generate profits. Past performance is not necessarily indicative of future results. There is substantial risk of loss associated with trading securities and options on equities. Only risk capital should be used to trade - that is, money you can afford to lose. Trading securities is not suitable for everyone. Futures, options, and currency trading all have large potential rewards, but they also have large potential risk. You must be aware of the risks and be willing to accept them in order to invest in these markets. This is neither a solicitation nor an offer to buy/sell futures, options, or currencies. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed. The past performance of any trading system or methodology is not necessarily indicative of future results.
